About the Instructor

Mr **Dennis Behnke** has been working in Greater China as a consultant, trainer, and project manager for more than ten years. He is specialised in planning, restructuring and optimising complex business processes in the manufacturing and tech industry.

Mr Behnke graduated in industrial engineering at Hamburg University of Technology (TUHH) and in business administration at Hamburg University. He is a certified instructor for industrial engineering (by REFA), for procurement and supply chain management (by ISM), as well as a certified Lean Six Sigma Master Black Belt (by CSSC). He speaks several languages and is giving trainings in German, English, and Chinese.

What is Lean Six Sigma?

Lean Six Sigma is one of the most well-known frameworks for business process planning and optimisation.

Six Sigma comprises a set of quantitative tools to achieve world-class process performance and a virtually zero-defect quality of products and services.

By combining **Lean Management** and Six Sigma we can use a data-driven management approach to not only enhance quality, but also decrease inventory levels, shorten lead-times, and increase flexibility of our production.

Courses
